### RULES AND REGULATIONS

- b. Private fire protection sprinkler systems may be connected to the District's mains for an annual charge of \$300 due and payable prior to installation of the sprinkler system and on the anniversary date of installation thereafter.

The District makes no warranty as to the sufficiency of the water supply or the adequacy of the water pressure at any time. Hydrants installed on the distribution lines of this District are for the sole purpose of flushing the lines, or other uses by the District necessary for proper maintenance of the lines. The District is not responsible for, nor does it guarantee, any minimum pressure or flow at these hydrants, other than the minimum required by the Public Service Commission for distribution lines. Hydrants may be used by fire department units in the performance of their duty, but any damage to the distribution lines resulting from excessive pumping pressure will be the liability of that unit.

New fire hydrants will be installed only if a professional engineer with a Kentucky registration has certified that the proposed fire hydrant will be able to provide a minimum fire flow of 250 gallons per minute and that the system supporting this flow has the capacity of providing this flow for a period of not less than two hours plus consumption at the maximum daily rate.

#### Fire Departments

- a. Any city, county, urban-county, fire protection district or volunteer fire protection district ("User") may withdraw water from the utility's water distribution system for fighting fires or training firefighters at no charge on the condition that it maintains estimates of the amount of water used for fire protection and training during the calendar month and reports the amount of this water usage to the utility no later than the 15<sup>th</sup> day of the following calendar month.
- b. Any User that with draws water from the utility's water distribution system for fire protection or training purposes and fails to submit the required report on water usage in a timely manner shall be assessed the cost of this water. A User shall submit a monthly report even if it withdraws no water for fire protection or training purposes.
- c. A non-reporting User's usage shall be presumed to be 0.3 percent of the utility's total water sales for the calendar month. A non-reporting User may present evidence of its actual usage to rebut the presumed usage. The utility shall consider this evidence and shall adjust the presumed usage amount accordingly.
- d. The non-reporting User shall be billed for this usage at the lowest usage block rate regardless of customer classification that the utility charges.
- e. A non-reporting User shall also be assessed a penalty of \$50.00 for each failure to submit a report in a timely manner.

**32. Multiple Users on One Meter**

A separate meter shall be installed for service to each residential or business unit. The customer will not permit anyone else to connect to the District's water line or meter or the customer's service line without the prior written consent of the District. Water furnished for a given residential or business unit shall be used at that unit only. Pending the elimination of all existing multiple use meters from the District's system, where two or more tenants or occupants (of different rental units) of property, including duplexes, apartment houses, mobile home parks, farms or other multi-unit premises, are served by a single water meter, the rates and charges shall be computed by dividing the number of gallons of water registered by such single meter by the numbers of customers being served through such meter and then applying the results thus obtained to the water rate schedule, then times the number of customers served to arrive at the monthly bill that the owner or occupant of the property must pay. In no event shall the monthly bill applicable to each tenant or occupant be less than the minimum water rate in the applicable rate schedule.
